Steam Sample Conditioning - HPHF

High Pressure High Flow

Pressure > 35 bar Temperature < 538°C

Control Your Steam Quality

- Increase lifetime of your steam applications
- Prevent corrosion in boilers and pipelines
- Optimize steam chemical composition
- Extract true representative samples of your steam water cycle

Typical P&ID Steam Sample Conditioning System Numbers correspond to the panel configurator on the next page Mechatest Steam Sample conditioning panels are available in many configurations for as many applications in the industry. This sampling panel is used in power plants and mostly used in combination with water analyser equipment for analysis on chemical parameters like Conductivity, pH, Dissolved Oxygen, Silica and Sodium. The panels are used for sample conditioning and collection.

SPECIFICATIONS

TYPICAL APPLICATOINS

Demi water

Feed water

Boiler water

Condensate

LP/HP Steam Life Steam

.

Sample pressure (recommended) Sample temperature (recommended) Flow single phase samples (water/condensate) Flow condensing samples (steam) Cooling water flow Sample tube length and cooling area Standard panel dimension

> 35 bar Max. 538 °C Max. 210 L/h Max. 120 L/h Max. 1500 L/h 11 m (0.33 m²) 850 x 500 mm

BUILT CONFORM

- ASME PTC 19.11-2008
- ASTM D1066
- ASTM D1192 / D3370
- SO 5667.7

SCS Steam Panel Configurator - HPHF

Ordering No.		-					-								
 INLET BLOCK VALVE No inlet valve Needle valve 316 SS(std. Swagelok) Double inlet valve FILTER ⁽¹⁾ No filter T-Filter 90 micron 316 SS (std. Swagelok) Filter large volume 90 micron 316 SS (std. Classic) 							 6 BACK PRESSURE REGULATION 0 No BPR mounting plate B Mounting plate for Swan BPR on panel 7 SAMPLE BLOWDOWN OPTIONS 0 No sample blowdown (Std.) C Cold sample blowdown H Hot sample blowdown CH Cold and Hot sample blowdown 								
 3 PRESSURE REGULATION 0 No pressure regulating valve 1 VREL pressure valve 316 SS (Std. Swagelok) 					 8 PRESSURE SAFETY OPTIONS 0 No pressure safety (Std.) 1 Pressure relief valve on C.W. connection 2 Pressure relief valve on Sample connection 										
 1 TEMPERATURE INDICATION ⁽¹⁾ 0 No temperature gauge 1 Temperature gauge 0, 60 °C 216 SS in flow chember up 						9 FLOW INDICATION0 No flow indication (Std.)									

1 Temperature gauge 0 - 60 °C 316 SS in flow chamber (Std.)

TEMPERATURE SAFETY⁽¹⁾ 5

- **0** No temperature shut-off valve
- 1 Automatic Temperature shut-off valve @ 46°C (Std.) (automatic open if temperature below setpoint)
- 2 Reset Temperature shut-off valve @ 46°C (Std. Centry) (reset to open if temperature below setpoint)
- 3 Electronic Temperature shut-off valve @ 46°C
- Other sizes, ranges or specifications available on request (1)(2)
 - Select from the "options" designator one or more options and fill in all these letters in the same colum

- **F** Flow indicator in sample line
- S Sight glass indicator in C.W. line

- **X** No options
- **A** Acid purging connection (T-conn. + valve)
- **E** Extension handle (on hot inlet valve)
- L Lab sample tablet / drain funnel
- P Portable (system on rack with wheels)

Koperslager 3 2631 RK Nootdorp The Netherlands Be part of the best solution

Mechatest is a Certified Industrial Sampling Systems Company with over 26 years of experience in design and manufacturing of fluid sampling systems. We understand how a sample behaves at the sample tap and transport into the lab. We offer the best knowledge, equipment and sampling solutions in the field
